**Challenge** half of drone commando level

## Actions

drone can use help, disengage, hide, disarm, use skill or tool, dodge, use evolution, use adhesive vines, use shapechange, use mimicry dash action

**Mimicry.** The monster can mimic sounds it has heard, including voices. Creatures that hear the sounds can tell they are imitations with a successful Wisdom (Insight) check opposed by your Charisma (Deception) check.

**Adhesive Vines.** The monster can use its action to extend a sticky vines up to 60 feet, and the vines adheres to anything of large size or smaller that touches it. A creature adhered to the vines is grappled by the monster (escape is equal to your DC), and ability checks made to escape this grapple have disadvantage. The vines can be attacked (AC 15; 5 hit points; immunity to poison and psychic damage), but a weapon that fails to sever it becomes stuck to it, requiring an action and a successful Strength check vs your DC to pull free. Destroying the vines causes no damage to the monster, which can extrude a replacement vines on its next turn.

**Resonant Connection.** If the monster has even a tiny piece of a creature or an object in its possession, such as a lock of hair or a splinter of wood, it knows the most direct route to that creature or object if it is within 10 miles of the monster.

**Living Storm.** The monster is always at the center of a storm 30ft in diameter. Heavy precipitation in the form of either rain or snow falls there, causing the area to be lightly obscured. Heavy rain also extinguishes open flames and imposes disadvantage on Wisdom (Perception) checks that rely on hearing. In addition, strong winds swirl in the area covered by the storm. The winds impose disadvantage on ranged attack rolls. The winds extinguish open flames and disperse fog.

**Mimicry.** The monster can mimic sounds it has heard, including voices. Creatures that hear the sounds can tell they are imitations with a successful Wisdom (Insight) check opposed by your Charisma (Deception) check.
